Российский морской регистр судоходства
Russian Maritime Register of Shipping
Регистровая книга судов, 2019
Register of Ships, 2019

The edition is prepared
by Russian Maritime Register of Shipping

© Российский морской регистр судоходства, 2019

The Register of Ships is published biannually and contains the information on sea-going self-propelled ships of 100 and above gross tonnage classed by Russian Maritime Register of Shipping.

This edition contains the information on the shipowners the names of which are recorded in Column 1 of the Register of Ships.

Data on shipowners contained in the Register of Ships is provided for reference purposes only and shall not entail any legal implications, i.e. accrual, alteration or suspension of civil rights since Russian

Maritime Register of Shipping is not the state ship registration authority.

The electronic version of the Register of Ships is available at the Russian Maritime Register of Shipping web site (<http://www.rs-class.org>), "Register of Ships".

The information published in the Register of Ships has been obtained from sources believed to be reliable. However, Russian Maritime Register of Shipping is unable to guarantee the accuracy of all details.

Symbols and Abbreviations Used in the Register of Ships

(sorted by Latin and then by Cyrillic)

For fuller explanation, see the Key to the Register of Ships.

A	Design category mark for pleasure craft.	CAT2	Chain of high strength
A1	Design category mark for pleasure craft.	CAT3	Chain of special strength
A2	Design category mark for pleasure craft.	CCO	Distinguishing mark for ships fitted with a centralized cargo control system
ACV	Air-cushion vehicle	ch	Cargo hatches
AIS	Automatic identification system	chc	Oil cargo heating coils
AISG	Automatic identification system with GLONASS	CO	Composite
ANTI-ICE	Distinguishing mark for ships fitted with equipment for icing protection	CONT	Distinguishing mark for ships fitted for possible carriage of the international standard containers
AP	Autopilot	CONTAINERS	Distinguishing mark of the refrigerating plant
APR	Air propeller	COW	Distinguishing mark for ships fitted with a crude oil washing system
Arc4	Ice class mark of the ship	CPP	Controllable pitch propeller
Arc5	Ice class mark of the ship	CSR	Distinguishing mark for oil tankers and for bulk carriers added to the character of classification
Arc6	Ice class mark of the ship	d	Derrick
Arc7	Ice class mark of the ship	D	Design category mark for pleasure craft
Arc8	Ice class mark of the ship	DE-Tier III	Distinguishing mark for marine diesel engine to comply with Tier III Limit according to Regulation 13 of Annex VI to MARPOL
Arc9	Ice class mark of the ship	DF	Direction finder
ARPA	Automatic radar plotting aids	DG(bulk)	Distinguishing mark for ships fitted for carriage of dangerous goods in bulk
ATWRT	Two-way VHF radiotelephone apparatus for communication with aircraft	DG(pack)	Distinguishing mark for ships fitted for carriage of dangerous goods packaged
AUT	Distinguishing automation mark for pleasure craft	dk	Decks
AUT1	Distinguishing automation mark	DPRR	HF direct-printing radiotelegraph receiver
AUT2	Distinguishing automation mark	DRTM	MF radio installation with digital selective calling
AUT3	Distinguishing automation mark	DRTMH	MF/HF radio installation with digital selective calling
AUT1-ICS	Distinguishing automation mark	DRTV	VHF radiotelephone station with digital selective calling
AUT2-ICS	Distinguishing automation mark	DWR	Digital selective calling receiver
AUT3-ICS	Distinguishing automation mark	DYNPOS-1	Distinguishing mark for ships fitted with Class 1 dynamic positioning system
AUT1-C	Distinguishing automation mark	DYNPOS-2	Distinguishing mark for ships fitted with Class 1 dynamic positioning system
AUT2-C	Distinguishing automation mark	DYNPOS-3	Distinguishing mark for ships fitted with Class 1 dynamic positioning system
AUT3-C	Distinguishing automation mark	ECDIS	Electronic chart display and navigational system
AUTstab	Automatic stabilization mark of the high-speed craft	ECO	Distinguishing mark of ecological safety
B	Berthed	ECO-S	Distinguishing mark of ecological safety
BC-A	Distinguishing mark of the bulk carrier	EGCR	Enhanced group calling receiver
BC-B	Distinguishing mark of the bulk carrier	el	Equipment Number
BC-C	Distinguishing mark of the bulk carrier	EPIRB	COSPAS-SARSAT satellite emergency position-indicating radio beacon
Berth-connected ship	Distinguishing mark for berth-connected ships	EPIRBG	COSPAS-SARSAT satellite emergency position-indicating radio beacon with GLONASS
bh	Bulkheads	EPIRBV	VHF emergency position-indicating radio beacon with digital selective calling
bhc	Water ballast heating coils	EPP	Distinguishing mark for ships fitted with the main electric propulsion plant
bl	Blades	ESD	Echo sounder
BLS	Distinguishing mark for ships to carry out cargo operations at offshore terminals	(ESP)	Distinguishing mark of enhanced survey program
BLS-SPM	Distinguishing mark for ships to carry out cargo operations at offshore terminals	FF1	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships, offshore drilling units, floating and shore structures
BMS	Distinguishing mark for ships fitted with boiler plant monitoring system	FF1WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships, offshore drilling units, floating and shore structures
BNWAS	Bridge navigational watch alarm system	FF2	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships, offshore drilling units, floating and shore structures
bo	Fuel oil-water ballast tanks with regard to substitution of water ballast by fuel oil	FF2WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships, offshore drilling units, floating and shore structures
BWM	Distinguishing mark for ships complying with ballast water management requirements	FF3WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships, offshore drilling units, floating and shore structures
BWM (E-S)	Distinguishing mark for ships complying with ballast water management requirements	fhc	Fuel oil heating coils
BWM (E-F)	Distinguishing mark for ships complying with ballast water management requirements	FPP	Fixed pitch propeller
BWM (E-D)	Distinguishing mark for ships complying with ballast water management requirements	FT	Fire tube
BWM (E-SF)	Distinguishing mark for ships complying with ballast water management requirements	GC	Gyrocompass
BWM (E-SD)	Distinguishing mark for ships complying with ballast water management requirements	GC	Gas carried (refrigerant)
BWM (E-FD)	Distinguishing mark for ships complying with ballast water management requirements	GFS	Distinguishing mark for a ship equipped to use gas fuel
BWM (E-SFD)	Distinguishing mark for ships complying with ballast water management requirements	gen	Electric power plant generator
c	Crane	GSES	GMDSS ship earth station
C	Design category mark for pleasure crafts	CSESG	GMDSS ship earth station with GLONASS
C1	Design category mark for pleasure crafts	h	Dry cargo holds
C2	Design category mark for pleasure crafts	HSC	High-speed craft
C3	Design category mark for pleasure crafts	HELIDECK	Distinguishing mark for ships fitted with helicopter facilities
CA	Distinguishing mark of the refrigerating plant	HELIDECK-F	Distinguishing mark for ships fitted with helicopter facilities
CAT1	Chain of ordinary strength	HELIDECK-H	Distinguishing mark for ships fitted with helicopter facilities
		HMS	Distinguishing mark for ships fitted with hull monitoring system
		IA Super	Distinguishing mark for Baltic ice class ship
		IA	Distinguishing mark for Baltic ice class ship

IB	Distinguishing mark for Baltic ice class ship	R3-RSN	Distinguishing mark for restricted area of navigation
IC	Distinguishing mark for Baltic ice class ship	R12	Freon 12
IB	Distinguishing mark for Baltic ice class ship	R22	Freon 22
II	Distinguishing mark for Baltic ice class ship	R22+R115	Azeothropic mixture
III	Distinguishing mark for Baltic ice class ship	R404A	Freon
Ice ()	Ice class mark of pleasure craft	R502	Azeothropic mixture
Ice1	Ice class mark of the ship	R717	Ammonia
Ice2	Ice class mark of the ship	R290	Propane
Ice3	Ice class mark of the ship	R1270	Propylene
Icebreaker6	Icebreaker ice class mark	R134A	Freon
Icebreaker7	Icebreaker ice class mark	R507A	Freon
Icebreaker8	Icebreaker ice class mark	R434	Freon
Icebreaker9	Icebreaker ice class mark	rcs	Refrigerated cargo spaces
IGS-IG	Distinguishing mark for ships fitted with an inert gas system	RDR	Radar
IGS-NG	Distinguishing mark for ships fitted with an inert gas system	REF	Distinguishing mark for ships intended for carriage of refrigerated cargo
IGS-Pad	Distinguishing mark for ships fitted with an inert gas system	(REF)	Distinguishing mark for ships intended for carriage of refrigerated cargo
INF1	Distinguishing mark for ships intended for carriage of packaged irradiated nuclear fuel, plutonium and high-level radioactive wastes (INF cargo)	REF★	Character of classification of the refrigerating plant
INF2	Distinguishing mark for ships intended for carriage of packaged irradiated nuclear fuel, plutonium and high-level radioactive wastes (INF cargo)	REF★	Character of classification of the refrigerating plant
INF3	Distinguishing mark for ships intended for carriage of packaged irradiated nuclear fuel, plutonium and high-level radioactive wastes (INF cargo)	(REF)★	Character of classification of the refrigerating plant
IWS	Distinguishing mark for ships prepared for in-water survey	RNSR	Radio navigation system receiver
KM★	Character of classification of the ship	RNSRG	Radio navigation system receiver with GLONASS
KM★	Character of classification of the ship	RP-1, RP-1A, RP-1AS, RP-2, RP-2S	Distinguishing marks for propulsion plant redundancy
KM★	Character of classification of the ship	RTG	Radiotelegraph station
(KM)★	Character of classification of the ship	RTGPH	Radiotelegraph-telephone station
KM★	Character of classification of the ship	RTI	Rate of turn indicator
L1	Ice category mark of the ship	RTPH	Radiotelephone station
L2	Ice category mark of the ship	RTR	Rotor
L3	Ice category mark of the ship	RTU	UHF radiotelephone station
L4	Ice category mark of the ship	RTV	VHF radiotelephone station
LG	Distinguishing mark of the refrigerating plant	SART	Search and rescue radar transponder, AIS search and rescue transmitter
LI	Distinguishing mark for ships fitted with a loading instrument	SARTG	AIS search and rescue transmitter with GLONASS
LL1	Icebreaker ice category mark	SCRT	Radio station for survival craft
LL2	Icebreaker ice category mark	SCS	Satellite communication system
LL3	Icebreaker ice category mark	SDS < 12	Distinguishing mark for ships fitted with a diving system permanently installed on the ship
LL4	Icebreaker ice category mark	SDS < 60	Distinguishing mark for ships fitted with a diving system permanently installed on the ship
LOG	Log (any type)	SDS ≥ 60	Distinguishing mark for ships fitted with a diving system permanently installed on the ship
LRIT	Equipment of long-range identification and tracking of ships	SES	Surface-effect ship
LRITG	Equipment of long-range identification and tracking of ships with GLONASS	SPM	Distinguishing mark for ships to carry out cargo operations at offshore terminals
MC	Magnetic compass	SO_x Cleaning	Distinguishing mark for alternative method of reducing (SO _x) emissions
MHC	Multi-hull craft	SWATH	Small water area twin hull ship
MS	Distinguishing mark for ships fitted with a manned submersible	TMS	Distinguishing mark for implementation of modified survey of a propeller shaft
MtA	MMASS type AZIPOD	so	Solid propeller
NAABSA1	Distinguishing mark for ships which are periodically grounded in operation	sp	Special personnel
NAABSA2	Distinguishing mark for ships which are periodically grounded in operation	SPM	Distinguishing mark for ships to carry out cargo operations at offshore terminals
NAABSA3	Distinguishing mark for ships which are periodically grounded in operation	SPU	Swinging propeller unit
NAV	NAVTEX receiver	SRS	Sound reception system
(no MP)	Distinguishing mark of the bulk carrier	SSAS	Ship security alert system
NS	Nuclear steam	SSASG	Ship security alert system with GLONASS
NVE	Night vision equipment	S-VDR	Simplified voyage data recorder
O	Distinguishing mark for day time navigation restriction	T0	Distinguishing mark for seasonal navigation restriction
ob	Fuel oil-water ballast tanks with regard to substitution of fuel oil by water ballast	T1	Distinguishing mark for seasonal navigation restriction
OMBO	Distinguishing mark of one man bridge operated ship	T2	Distinguishing mark for seasonal navigation restriction
PAS	Public address system	T3	Distinguishing mark for seasonal navigation restriction
PC1	Distinguishing mark for IACS polar class ships	TEU	Twenty-foot equivalent unit
PC2	Distinguishing mark for IACS polar class ships	THD	Transmitting heading device
PC3	Distinguishing mark for IACS polar class ships	tk	Oil tanks
PC4	Distinguishing mark for IACS polar class ships	TWRT	Two-way radiotelephone apparatus
PC5	Distinguishing mark for IACS polar class ships	UL	Ice category mark of the ship
PC6	Distinguishing mark for IACS polar class ships	ULA	Ice category mark of the ship
PC7	Distinguishing mark for IACS polar class ships	unb	Unberthed
pem	Main propulsion electric motor	VCS	Distinguishing mark for ships fitted with a cargo vapour discharge system
PMS	Distinguishing mark for ships fitted with a machinery technical condition monitoring system	VDR	Voyage data recorder
POSIMOOR	Distinguishing mark for ships fitted with a position mooring system	VSP	Voith-Schneider propeller
POSIMOOR-TA	Distinguishing mark for ships fitted with a position mooring system	WINTERIZATION(DAT)	Distinguishing mark for ship equipment to ensure long-term operation at low temperatures
PRECOOLING	Distinguishing mark of the refrigerating plant	WJP	Water-jet propeller
PWH	Paddle wheels	WT	Water tube
QUICK FREEZING	Distinguishing mark of the refrigerating plant	[1]	Subdivision distinguishing mark
R	Insulated (container)	[2]	Subdivision distinguishing mark
r	Insulated (cargo hatch)	[3]	Subdivision distinguishing mark
R1	Distinguishing mark for restricted area of navigation	✉	Distinguishing mark of the nuclear ship
R2	Distinguishing mark for restricted area of navigation		
R2-RSN	Distinguishing mark for restricted area of navigation		
R2-RSN(4,5)	Distinguishing mark for restricted area of navigation		
R3	Distinguishing mark for restricted area of navigation		

Key to the Register of Ships

The information in each column of the Register of Ships is strictly positioned on the lines. The blank space means no information is recorded.

Column 1. Ship

RS Number

The unique six digit identification number assigned to the ship by the Russian Maritime Register of Shipping. The number remains unchanged during the life of the ship.

IMO Number

The International Maritime Organization (IMO) identification number.

Signal letters

The radio call sign assigned to the ship under the law of the country the flag of which the ship flies.

Ship's name

The ships are listed in the Register of Ships as follows: names in Russian alphabetical order, names beginning with Arabic numerals, Roman numerals, names in Latin alphabetical order from "A" to "Z". In most cases, the Russian names are transliterated into Latin.

Former name

The last former name of the ship and the year of the change of name printed in bold type.

Owner

A physical or juridical person legally owing the ship. The information about the owner and his ships are published in this edition.

Port of Registry

The name of the port where the ship is registered.

Flag

An official identification symbol of the state where the ship is registered.

Column 2. Dimensions

The dimensions in brackets refer to the second class notation shown in Column 3.

Tonnage

Gross and net tonnages printed in bold type are determined in accordance with the provisions of the International Convention on Tonnage Measurement of Ships, 1969 and have no unit of measure.

Main dimensions

Main dimensions of the ship in metres and fractions thereof. The overall length and extreme breadth include any permanent protrusions of the hull.

Deadweight and Displacement

Deadweight and displacement in tons correspond to the draught of the ship when loaded to the summer loadline.

Speed

The speed of the fully loaded ship in knots.

Column 3. Class/Navigation aids

Ship's class

Class notation of the ship denoting that the ship fully or to a degree considered adequate by Russian Maritime Register of Shipping complies with those requirements of Russian Maritime Register of Shipping Rules which apply to her according to her functions, service conditions and class notation and that the ship is under Russian Maritime Register of Shipping supervision specified by the Rules in respect of her technical condition during the specified period with performing mandatory surveys prescribed by the Rules for this period. The class of the ship is certified by the valid Classification Certificate on board.

Where the ship is assigned the second class of Russian Maritime Register of Shipping, its notation is shown in the same Column.

The following symbols, distinguishing marks and descriptive notations are used in the class notation.

KM★ Character of classification assigned to the ship or the floating facility which was constructed in accordance with the Rules and surveyed by Russian Maritime Register of Shipping.

KM★ Character of classification assigned to the ship or the floating facility which was built according to the rules of ACS – IACS Member and surveyed by that Society during their construction and afterwards the ship or floating facility was classed by Russian Maritime Register of Shipping.

KM★ Character of classification assigned to the ship or the floating facility which was as a whole (or its hull or machinery installation, machinery, equipment) built or manufactured in accordance with the Rules and under the supervision of an IACS Member classification society but to which, due to specific structural features, **KM★** symbol cannot be assigned during the process of transfer of class to Russian Maritime Register of Shipping.

(KM)★ Character of classification assigned to the ship or the floating facility which was as a whole (or its hull or machinery installation, machinery, equipment) built or manufactured without being surveyed by ACS – IACS Member or without any survey of a classification society at all and afterwards the ship or the floating facility was classed by Russian Maritime Register of Shipping.

KM★ Character of classification assigned to the ship or the floating facility which was classed with Russian Maritime Register of Shipping along with another classification society (dual class).

ULA Ice category mark of the ship (independent navigation in all areas of the World ocean in summer and autumn).

UL Ice category mark of the ship (independent navigation in the Arctic in summer and autumn in light ice conditions and in the non-arctic freezing seas all the year round).

L1 Ice category mark of the ship (independent navigation in the Arctic in summer in broken open ice and in the non-arctic freezing seas all the year round in light ice conditions).

L2 Ice category mark of the ship (independent navigation in the non-arctic seas in small open ice).

L3 Ice category mark of the ship (independent navigation in the non-arctic seas in small open ice).

L4 Ice category mark of the ship (independent navigation in the non-arctic seas in small open ice, short period).

Ice () Ice class mark for pleasure crafts, in parentheses the thickness of ice cake, in cm, at which craft operation is allowed.

Ice1 Ice class mark of the ship (episodical voyage in open floating ice-cake ice of non-arctic seas up to 0,4 m thickness).

Ice2 Ice class mark of the ship (regular voyage in open floating ice-cake ice of non-arctic seas up to 0,5 m thickness).

Ice3 Ice class mark of the ship (regular voyage in open floating ice-cake ice of non-arctic seas up to 0,7 m thickness).

Arc4 Ice class mark of the ship (in summer/autumn navigation in Arctic – voyage in open floating first-year ice up to 0,8 m thickness. In winter/spring navigation in Arctic - voyage in open floating first-year ice up to 0,6 m thickness. Year-round voyage in freezing non-arctic seas in light ice conditions).

Arc5 Ice class mark of the ship (in summer/autumn navigation in Arctic–voyage in open floating first-year ice up to 1,0 m thickness. In winter/spring navigation in Arctic – voyage in open floating first-year ice up to 0,8 m thickness. Year-round voyage in freezing non-arctic seas).

Arc6 Ice class mark of the ship (in summer/autumn navigation in Arctic–voyage in open floating first-year ice up to 1,3 m thickness. In winter/spring navigation in Arctic – voyage in open floating first-year ice up to 1,1 m thickness. Year-round voyage in freezing non-arctic seas).

Arc7 Ice category mark of the ship (in summer/autumn navigation – voyage in all areas of the World Ocean. In winter/spring navigation in Arctic – voyage

Arc8	in close floating first-year ice up to 1,4 m thickness and in freezing non-arctic seas without restrictions).	PC7	Distinguishing mark for IACS polar class ships intended for summer/autumn operation in thin first-year ice which may include old ice inclusions.
Arc9	Ice class mark of the ship (in summer/autumn navigation – voyage in all areas of the World Ocean. In winter/spring navigation in Arctic – voyage in close floating second-year ice up to 2,1 m thickness and in freezing non-arctic seas without restrictions).	IA Super	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships with such structure, engine output and other properties that they are normally capable of navigating in difficult ice conditions without the assistance of icebreakers;
LL1	Ice class mark of the ship (in summer/autumn navigation – voyage in all areas of the World Ocean. In winter/spring navigation in Arctic – voyage in very close floating ice and in compact multi-year ice of up to 3,5 m thickness and in freezing non-arctic seas without restrictions).	IA	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships with such structure, engine output and other properties that they are capable of navigating in difficult ice conditions, with the assistance of icebreakers when necessary
LL2	Icebreaker ice category mark (intended for all kinds of icebreaking operations in the arctic seas on coastal routes and shore ice belt routes in high latitudes all the year round and capable of forcing the way in compact ice field over 2,0 m thick. The total shaft power is 47807 kW and over).	IB	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships with such structure, engine output and other properties that they are capable of navigating in moderate ice conditions, with the assistance of icebreakers when necessary
LL3	Icebreaker ice category mark (intended for all kinds of icebreaking operations in the arctic seas during the summer period and for operation on coastal routes during the winter period and capable of forcing the way in compact ice field less than 2,0 m thick. The total shaft power is 22065-47807 kW).	IC	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships with such structure, engine output and other properties that they are capable of navigating in light ice conditions, with the assistance of icebreakers when necessary
LL4	Icebreaker ice category mark (intended for all kinds of icebreaking operations in harbour and roadstead water areas without assistance all the year round as well as for operations in the non-arctic freezing seas under convoy of icebreakers of higher category during the winter period, and capable of forcing the way in compact ice field up to 1,0 m thick. The total shaft power is under 11032 kW).	II	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships that have a steel hull and that are structurally fit for navigation in the open sea and that, despite not being strengthened for navigation in ice, are capable of navigating in very light ice conditions with their own propulsion machinery
Icebreaker6	Icebreaker ice class mark (intended for icebreaking operations in harbour and roadstead water areas as well as in the non-arctic freezing seas with ice up to 1,5 m thick, and capable of forcing the way continuously running in compact ice field up to 1,0 m thick).	III	Baltic ice class mark of the ship (apply to the ships operating in the Baltic Sea area in winter) ships that do not belong to the other Baltic ice classes
Icebreaker7	Icebreaker ice class mark (intended for icebreaking operations: on coastal routes of the arctic seas in winter and spring with ice up to 2,0 m thick and 2,5 m thick in summer and autumn; in the non-arctic freezing seas and mouths of rivers flowing into the arctic seas with ice up to 2,0 m thick, and capable of forcing the way continuously running in compact ice field up to 1,5 m thick. The total shaft power is not less than 11 mW).	I	Subdivision distinguishing mark (one compartment flooded).
Icebreaker8	Icebreaker ice class mark (intended for icebreaking operations: on coastal routes of the arctic seas in winter and spring with ice up to 3,0 m thick and in summer and autumn with no restrictions, and capable of forcing the way continuously running in compact ice field up to 2,0 m thick. The total shaft power is not less than 22 mW).	II	Subdivision distinguishing mark (two compartments flooded).
Icebreaker9	Icebreaker ice class mark (intended for icebreaking operations: in the arctic seas in winter and spring with ice up to 4,0 m thick and in summer and autumn with no restrictions, and capable of forcing the way continuously running in compact ice field over to 2,0 m thick. The total shaft power is not less than 48 mW).	III	Subdivision distinguishing mark (three compartments flooded).
PC1	Distinguishing mark for IACS polar class ships intended for year-round operation in all polar waters.	R1	Distinguishing mark for restricted area of navigation (navigation in sea areas at seas in a seaway with wave height with 3 per cent probability of exceeding 8,5 m and with proceeding not more than 200 miles away from the place of refuge and with an allowable distance between the places of refuge not more than 400 miles).
PC2	Distinguishing mark for IACS polar class ships intended for year-round operation in moderate multi-year ice conditions.	R2	Distinguishing mark for restricted area of navigation (navigation in sea areas at seas in seaway with wave height with 3 per cent probability of exceeding 7,0 m and with proceeding not more than 100 miles away from the place of refuge and with an allowable distance between the places of refuge not more than 200 miles).
PC3	Distinguishing mark for IACS polar class ships intended for year-round operation in second-year ice which may include multi-year ice inclusions.	R2-RSN	Distinguishing mark for restricted area of navigation (river-sea navigation in a seaway with wave height with 3 per cent probability of exceeding 6,0 m and with proceeding from the place of refuge: - in open seas up to 50 miles and with an allowable distance between the places of refuge not more than 100 miles; - in closed seas up to 100 miles and with an allowable distance between the places of refuge not more than 200 miles).
PC4	Distinguishing mark for IACS polar class ships intended for year-round operation in thick first-year ice which may include old ice inclusions.	R2-RSN (4,5)	Distinguishing mark for restricted area of navigation (river-sea navigation in a seaway with wave height with 3 per cent probability of exceeding 4,5 m and with proceeding from the place of refuge: - in open seas up to 50 miles and with an allowable distance between the places of refuge not more than 100 miles; - in closed seas up to 100 miles and with an allowable distance between the places of refuge not more than 200 miles).
PC5	Distinguishing mark for IACS polar class ships intended for year-round operation in medium first-year ice which may include old ice inclusions.	R3	Distinguishing mark for restricted area of navigation (port, roadstead and coastal navigation within limits established by Russian Maritime Register of Shipping in each case).
PC6	Distinguishing mark for IACS polar class ships intended for summer/autumn operation in medium first-year ice which may include old ice inclusions.	R3-RSN	Distinguishing mark for restricted area of navigation (river-sea navigation at seas in a seaway with wave height with 3 per cent probability of exceeding 3,5 m with due regard for particular restrictions on the area and conditions of navigation resulting from the wind and wave conditions of the basins with determination of a maximum allowable distance from the place of refuge which in no case should be more than 50 miles).
		Berth-connected ship	Distinguishing mark for restricted area of navigation for berth-connected ships.
		A, A1, A2, B, C, C1, C2, C3, D	- Design category mark for pleasure crafts
		AUT	Distinguishing automation mark for pleasure craft.
		AUT1	Distinguishing automation mark (automation extent of the machinery installation, is sufficient for operation of the machinery installation

AUT2	with unattended machinery spaces and main machinery control room as well).	FF2	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships (the ship carries supplementary systems, equipment and outfit for fire fighting aboard other ships, offshore drilling units, floating and shore structures and is in full compliance with the relevant requirements of the Rules in respect to these appliances proceeding from the degree of the ship's equipment with these appliances which is determined on the basis of the list of fire fighting equipment and systems prescribed by the Rules).
AUT3	Distinguishing automation mark (automation extent of the machinery installation is sufficient for operation of the machinery installation by one operator from the main machinery control room with unattended machinery spaces).	FF2WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships (the ship carries supplementary systems, equipment and outfit for fire fighting aboard other ships, offshore drilling units, floating and shore structures and is in full compliance with the relevant requirements of the Rules in respect to these appliances proceeding from the degree of the ship's equipment with these appliances which is determined on the basis of the list of fire fighting equipment and systems prescribed by the Rules).
AUT1-ICS, AUT2-ICS, AUT3-ICS	Distinguishing automation marks denoting that automation is effected by using integrated computer systems for control and monitoring.	FF3WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships (the ship carries supplementary systems, equipment and outfit for fire fighting aboard other ships, offshore drilling units, floating and shore structures and is in full compliance with the relevant requirements of the Rules in respect to these appliances proceeding from the degree of the ship's equipment with these appliances which is determined on the basis of the list of fire fighting equipment and systems prescribed by the Rules).
AUT1-C, AUT2-C, AUT3-C	Distinguishing automation marks denoting that automation is effected by using computers or program logical controllers (PLC).	REF	Distinguishing mark for ships intended for carriage of refrigerated cargo in the specially equipped cargo spaces and/or in the insulated containers and has the refrigerating plant classed by Russian Maritime Register of Shipping.
AUTstab	Automatic stabilization mark of the high-speed craft (the craft is equipped with the system providing the automatic or semi-automatic stabilization in space and the craft is unable to move under service conditions without this system).	(REF)	Distinguishing mark for Ships intended for carriage or storage of refrigerated cargo or catch in ship's cargo spaces and/or in thermal containers and using non-classed refrigerating plant for maintaining the required temperature.
CONT	Distinguishing mark for ships fitted for possible carriage of the international standard containers.	ANTI-ICE	Distinguishing mark for ships the design and equipment of which provide effective icing protection.
DE-Tier III	Distinguishing mark for marine diesel engine to comply with Tier III Limit according to Regulation 13 of Annex VI to MARPOL.	BLS	Distinguishing mark for ships equipped with the bow loading system but not equipped with the mooring arrangement ensuring operation with single point mooring.
DG(bulk), DG(pack)	Distinguishing mark for ships fitted for carriage of dangerous goods in bulk or packaged.	BLS-SPM	Distinguishing mark for ships equipped with the bow loading system and the mooring arrangement ensuring operation with single point mooring.
DYNPOS-1	Distinguishing mark for ships fitted with Class 1 dynamic positioning system (dynamic positioning system with minimum redundancy of its sub-systems. Loss of position can occur upon single failure in the system, i.e. a failure in any active or passive component).	SPM	Distinguishing mark for ships not equipped with the bow loading system the mooring arrangement of which ensures operation with single point mooring.
DYNPOS-2	Distinguishing mark for ships fitted with Class 2 dynamic positioning system (dynamic positioning system having such redundancy of its sub-systems that the position keeping ability of the ship is maintained without disruption upon single failure in any active component of the system, while it is considered that failure in any passive component is precluded owing to provision of appropriate protection).	BMS	Distinguishing mark for ships fitted with boiler plant monitoring system.
DYNPOS-3	Distinguishing mark for ships fitted with Class 3 dynamic positioning system (dynamic positioning system having such redundancy of its sub-systems that the position keeping ability of the ship is maintained without disruption in the following cases: - single failure in any active and passive component, or - failure in any active and passive components located in any one of the watertight compartments, due to flooding, or - failure in active and passive components located within any of the fire zones, due to fire).	BWM, BWM (E-S), BWM (E-F), BWM (E-D), BWM (E-SF), BWM (E-SD), BWM (E-FD), BWM (E-SFD)	Distinguishing marks for ships performing ballast water management through ballast water exchange at sea and carrying Ballast Water Management Plan approved by Russian Maritime Register of Shipping. Letters in brackets indicate the ballast water management method: E means that ballast water management is performed through ballast water exchange at sea; S means that sequential method is used; F means that flow-through method is used; D means that dilution method is used; SF, SD, FD and SFD mean that combined ballast water exchange method is used being a combination of the above methods.
ECO	Distinguishing mark in the class notation, which identifies the basic requirements for controlling and limiting operational emissions and discharges.	CCO	Distinguishing mark for ships fitted with a centralized cargo control system.
ECO-S	Distinguishing mark in the class notation, which identifies the basic requirements for controlling and limiting operational emissions and discharges.	COMF(C)	Distinguishing mark for ships comply with the indoor hygiene and sanitary conditions.
(ESP)	Distinguishing mark of enhanced survey program.	COW	Distinguishing mark for ships fitted with a crude oil washing system.
OMBO	Distinguishing mark of one man bridge operated ship.	CSR	Distinguishing mark for oil tankers and bulk carriers fully complying with the requirements of Part XVIII "Common Structural Rules for Bulk Carriers and Oil Tankers" to be mandatory added after the descriptive notation.
FF1	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships (the ship carries supplementary systems, equipment and outfit for fire fighting aboard other ships, offshore drilling units, floating and shore structures and is in full compliance with the relevant requirements of the Rules in respect to these appliances proceeding from the degree of the ship's equipment with these appliances which is determined on the basis of the list of fire fighting equipment and systems prescribed by the Rules).	EPP	Distinguishing mark for ships fitted with the main electric propulsion plant.
FF1WS	Distinguishing mark for ships carrying equipment for fire fighting aboard other ships (the ship carries supplementary systems, equipment and outfit for fire fighting aboard other ships, offshore drilling units, floating and shore structures and is in full compliance with the relevant requirements of the Rules in respect to these appliances proceeding from the degree of the ship's equipment with these appliances which is determined on the basis of the list of fire fighting equipment and systems prescribed by the Rules).	GFS	Distinguishing mark for a ship equipped to use gas fuel.
		GRS	Distinguishing mark for ships prepared for conversion for the use of gas fuel.
		HELIDECK	Distinguishing mark for ships fitted with a helideck.

HELIDECK-F	Distinguishing mark for ships fitted with helicopter refueling facilities.	T2	Distinguishing mark for seasonal navigation restriction for craft built, equipped and outfitted for navigation in summer period in the summer zone;
HELIDECK-H	Distinguishing mark for ships fitted with hangar facilities.	T3	for craft built, equipped and outfitted for year round navigation in tropical zone and tropical seasonal area; navigation in zone denoted T2 is also possible.
HMS	Distinguishing mark for ships fitted with hull monitoring system.	⊗	Distinguishing mark of the nuclear ship (the ship is fitted with a nuclear propulsion plant).
HSC	High-speed craft.	NSV	nuclear support vessel.
IGS-IG	Distinguishing mark for ships fitted with an inert gas system if a system uses an oil-burning inert gas generator as the inert gas source.	SWATH	Small water area twin hull ship.
IGS-NG	Distinguishing mark for ships fitted with an inert gas system if a system uses a nitrogen generator as the inert gas source.	bulk carrier BC-A (ESP)	Ship, 150 m or over in length, which is intended to carry bulk cargoes with a density of 1 t/m ³ and above, with some of her holds remaining empty at maximum draught.
IGS-Pad	Distinguishing mark for ships fitted with an inert gas system if an inert gas system is only intended for forming an insulating pad in cargo tanks.	bulk carrier BC-B (ESP)	Ship, 150 m or over in length, which is intended to carry bulk cargoes with a density of 1 t/m ³ and above, with all of her holds loaded.
INF1, INF2, INF3	Distinguishing marks for Class INF1, INF2, INF3 ships intended for carriage of packaged irradiated nuclear fuel, plutonium and high-level radioactive wastes (INF cargo).	bulk carrier BC-C (ESP)	Ship, 150 m or over in length, which is intended to carry bulk cargoes with a density below 1 t/m ³ .
IWS	Distinguishing mark for ships prepared for in-water survey	bulk carrier BC-A (ESP)(no MP)	Ship, 150 m or over in length, which is intended to carry bulk cargoes with a density of 1 t/m ³ and above, with some of her holds remaining empty at maximum draught. The ship is not initially designed for loading or unloading in several ports.
LI	Distinguishing mark for ships fitted with a loading instrument.	bulk carrier BC-B (ESP)(no MP)	Ship, 150 m or over in length, which is intended to carry bulk cargoes with a density of 1 t/m ³ and above, with all of her holds loaded. The ship is not initially designed for loading or unloading in several ports.
MHS	Multi-hull craft.	gas carrier type 1G	Ship intended to transport products which are the most hazardous for the human and environment, and require maximum preventive measures to preclude escape of such products.
MS	Distinguishing mark for ships fitted with a manned submersible.	gas carrier type 2G	Ship intended to transport products which require significant preventive measures to preclude escape of such products.
NAABSA1	Distinguishing mark for ships which are periodically grounded in operation. Partial or full ship underwater hull baring is permitted on plane homogeneous sand-and-shingle or sand-and-mud seabeds with no motion in calm water as harbours or sheltered areas.	gas carrier type 2PG	Ship with a length 150 m and below intended to transport products which require significant preventive measures to preclude escape of such products, and where the products are transported in independent type C tanks designed for MARVS of at least 0,7 MPa gauge and a cargo containment system design temperature of -55 °C or above.
NAABSA2	Distinguishing mark for ships which are periodically grounded in operation. In addition to NAABSA1 distinguishing mark requirements specified above, motion and ship bow impact contact with seabed at defined wave parameters are permitted.	gas carrier type 3G	Ship intended to transport products which require moderate preventive measures to preclude escape of such products.
NAABSA3	Distinguishing mark for ships which are periodically grounded in operation. in addition to NAABSA2 distinguishing mark requirements specified above, hull baring of moored ship is permitted at specified distance from seashore line in rolling conditions with impact contact against the seabed in any point of the hull bottom.	chemical	Ship intended to transport products which require maximum preventive measures to preclude escape of such products.
O	Distinguishing mark for day time navigation restriction; navigation only in the daylight may be allowed.	tanker type 1	Ship intended to transport products which require significant preventive measures to preclude escape of such products.
PMS	Distinguishing mark for ships fitted with a machinery technical condition monitoring system.	chemical	Ship intended to transport products which require significant preventive measures to preclude escape of such products.
POSIMOOR	Distinguishing mark for ships fitted with a position mooring system ensuring the ship's position keeping by means of tensile anchor lines.	tanker type 2	Ship intended to transport products of sufficient hazard to require moderate degree of containment to increase survival capability in a damaged condition.
POSIMOOR-TA	Distinguishing mark for ships fitted with a position mooring system ensuring the ship's position keeping by means of tensile anchor lines with the use of the ship's main propulsion plant and thrusters.		
SDS<12	Distinguishing mark for ships fitted with a diving system permanently installed on the ships fitted with a diving system designed for diving operations at depths less than 12 m.		
SDS < 60	Distinguishing mark for ships fitted with a diving system permanently installed on the ships fitted with a diving system designed for diving operations at depths less than 60 m.		
SDS ≥ 60	Distinguishing mark for ships fitted with a diving system permanently installed on the ship for ships fitted with a diving system designed for diving operations at depths of 60 m and over.		
RP-1, RP-1A, RP-1AS, RP-2, RP-2S	- Distinguishing marks for propulsion plant redundancy (depending on the redundancy arrangement)		
SO_x Cleaning	Distinguishing mark for alternative method of reducing (SO _x) emissions.		
TMS	Distinguishing mark for implementation of modified survey of a propeller shaft.		
VCS	Distinguishing mark for ships fitted with a cargo vapour discharge system.		
WINTERIZATION(DAT)	Distinguishing mark for ship equipment to ensure long-term operation at low temperatures. Design ambient temperature is indicated in brackets.		
T0	Distinguishing mark for seasonal navigation restriction for craft built, equipped and outfitted for navigation in summer in the winter seasonal zone or area; navigation in zones denoted T1 and T2 is also possible;	REF⊗	Character of classification assigned to the refrigerating plant built in accordance with Rules and under the supervision of Russian Maritime Register of Shipping.
T1	Distinguishing mark for seasonal navigation restriction for craft built, equipped and outfitted to be capable of year-round navigating in summer zone; navigation in zone denoted T2 is also possible;	REF★	Character of classification assigned to the refrigerating plant built in accordance with Rules and under the supervision of a classification body recognized by Russian Maritime Register of Shipping and afterwards the plant was classed by Russian Maritime Register of Shipping.
		REF★	Character of classification assigned to the refrigerating plant built in accordance with the Rules and under the supervision of an IACS

	Member classification society but to which, due to incomplete compliance with the Rules, the symbol X★ cannot be assigned during the process of transfer of class to Russian Maritime Register of Shipping.	MC	Magnetic compass					
(REF)★	Character of classification assigned to the refrigerating plant built without the supervision of a classification body recognized by Russian Maritime Register of Shipping or any other classification body and afterwards the plant was classed by Russian Maritime Register of Shipping.	NAV	NAVTEX receiver					
RP-1, RP-1A, RP-1AS, RP-2, RP-2S	- Distinguishing marks for propulsion plant redundancy (depending on the redundancy arrangement).	NVE	Night vision equipment					
CA	Distinguishing mark denoting that in addition to the refrigerating plant the ship is equipped with the system regulating the composition of the gas environment in the refrigerated cargo spaces and/or insulated containers.	PAS	Public address system					
CONTAINERS	Distinguishing mark denoting that the refrigerating plant is intended for the cooling of cargo carried in the insulated containers.	RDR	Radar					
LG	Distinguishing mark denoting that the refrigerating plant is intended to maintain the required conditions for the carriage of the liquefied gas in bulk.	RNSR	Radionavigation system receiver					
QUICK FREEZING	Distinguishing mark denoting the capability of refrigerating plant of the factory ship to cool and freeze the sea products.	RNSRG	Radio navigation system receiver with GLONASS					
PRECOOLING	Distinguishing mark of the refrigerating plant capability to refrigerate non-precooled sea products (the cooling capacity of the refrigerating plant is sufficient for refrigeration of a non-precooled cargo on board ship during a period of time that provides preservation of that cargo).	RTG	Radiotelegraph					
Refrig.temperature (Refrigerating temperature)		RTGPH	Radiotelegraph-telephone					
Specified refrigerating temperature of the cargo spaces and/or insulated containers in degrees Celsius.		RTPH	Radiotelephone					
		RTI	Rate of turn indicator					
		RTU	UHF radiotelephone station					
		RTV	VHF radiotelephone station					
		SART	Search and rescue radar transponder, AIS search and rescue transmitter					
		SARTG	AIS search and rescue transmitter with GLONASS					
		SCS	Satellite communication system					
		SCRT	Radio station for survival craft					
		SRS	Sound reception system					
		SSAS	Ship security alert system					
		SSASG	Ship security alert system with GLONASS					
		S-VDR	Simplified voyage data recorder					
		THD	Transmitting heading device					
		TWRT	Two-way radiotelephone apparatus					
		VDR	Voyage data recorder					
		(GMDSS sea area A1) The area within the radiotelephone coverage of at least one VHF coast station in which continuous digital selective calling (DSC) is available						
		(GMDSS sea area A2) The area, excluding GMDSS sea area A1, within the radiotelephone coverage of at least one MF coast station in which continuous digital selective calling (DSC) is available						
		(GMDSS sea area A3) The area, excluding GMDSS sea areas A1 and A2, within the radiotelephone coverage of an INMARSAT geostationary satellites in which continuous alerting is available						
		(GMDSS sea area A4) The area, excluding GMDSS sea areas A1, A2 and A3						
Column 4. Hull/Cargo facilities								
Date and place of build								
Year, month and country of build of the ship. Date of build is the date at which the new construction survey process is completed. In case of substantial delay between completion of construction survey process and the ship commencing active service, the date of commissioning is shown in parentheses.								
Hull No.								
The shipbuilder's number.								
Ship's type								
The description of the ship printed in bold type is the basic type of the ship. The information shown under the basic type in light type indicate the additional features (subtypes) of the ship based on the known functions thereof.								
Ship's type in brackets refers to the class notation shown in Column 3.								
Decks								
dk	Decks							
Bulkheads								
bh	Bulkheads							
Passengers								
Number of berthed and/or unberthed passengers.								
b	Berthed							
unb	Unberthed							
Special personnel								
Number of special personnel (persons who are not passengers or members of the crew or children of under one year of age and who are carried on board in connection with the special purpose of the ship or because of special work being carried out aboard the ship).								
sp	Special personnel							

Holds (Dry cargo holds)

Number of holds for general cargo and the capacity of one hold in cubic meters. For barge carriers — number of barges and the loading capacity of one barge in tons.

h Dry cargo holds

Refrigerated cargo spaces

Total number and total capacity in cubic meters.

rcs Refrigerated holds

Tanks

Total number and total capacity in cubic meters.

tk Oil tanks

Hatches (Cargo hatches)

Number and dimensions of upper deck cargo hatches of dry cargo and refrigerated holds in meters and fractions thereof. For ro-ro ships — number and dimensions of the entrance gates in meters and fractions thereof. For barge carriers — number of hatches and dimensions of one hatch of one barge in meters and fractions thereof.

ch Cargo hatches

r Insulated (cargo hatches)

Derricks and cranes

Number and lifting capacity of derricks and cranes intended solely for cargo spaces, in tons and fractions thereof.

c Crane

d Derrick

Containers

Number of containers in TEU irrespective whether they are carried in holds and/or deck.

R Insulated (containers)

TEU Twenty-foot equivalent unit

Column 5. Machinery**Propulsion**

Type

Main engine date of build

Year of build of main engine.

Main engine place of build

Country of build of main engine.

Main engine model No. (Designation of main engine)

The manufacturer's model designation.

Main engine number, power (Number and power output of main engines)

Number of engines of the identical model designation and power output of one engine in kW. For electric propulsion plant — number and power output of the main generators in kW.

**Main boilers number, type, pressure/heating surface
(Number, type and pressure/heating surface of main boilers)**

CO Composite

FT Fire tube

NS Nuclear steam

WT Water tube

Propulsion el.motors number, power**(Number and power output of propulsion electric motors)**

Power output in kW is shown for one propulsion electric motor.

pem Main propulsion electric motor

Generators number, power (Number and power output of generators)

Power output in kW is shown for one generator of ship's generating plant.

gen Electric power plant generator

Propeller

Type of propeller.

APR Air propeller

bl Blades

CPP Controllable pitch propeller

db Detachable blades

FPP Fixed pitch propeller

MtA MMASS type AZIPOD

PWH Paddle wheels

RTR Rotor

so Solid propeller

SPU Swinging propeller unit

VSP Voith-Schneider propeller

WJP Water-jet propeller

Column 6. Capacities**FO bunkers (Fuel oil bunkers)**

Maximum capacity of fuel oil bunkers in tons.

bo Fuel oil-water ballast tanks with regard to substitution of water ballast by fuel oil

FO type (Fuel oil type)**Water ballast**

ob Fuel oil-water ballast tanks with regard to substitution of fuel oil by water ballast

Heating coils

Heating coils in cargo spaces, fuel oil tanks, cleaning water tanks and water ballast tanks.

bhc Water ballast heating coils

chc Oil cargo heating coils

fhc Fuel oil heating coils

Equipment

Equipment Number, grade of anchor chain cable and diameter of anchor chain cable in millimeters is recorded.

el Equipment Number

CAT1 Anchor chain of ordinary strength

CAT2 Anchor chain of high strength

CAT3 Anchor chain of special strength

Register of Ships

List of Shipowners

The List contains the information on the shipowners and their fleets. The name of the shipowner is shown in the first line in capital letters. The number which is the unique identification code of the shipowner is shown in the same line. The name is followed by the form of property of the shipowner, where applicable, its postal address, telephone number, telefax number, telex number. Where no address is available the town and country of registration are shown.

Each ship is identified by name, identification number, flag, call sign, gross tonnage, deadweight (for passenger ships the passenger capacity is shown, for container ships – total number of containers in TEU), year of build. To provide a quick view of the geographical location the shipowners are shown in alphabetical order of towns within countries at the end of the List.
